Teradata® AppCenter 2.0 Release Summary

AppCenter 2.0 Release Notes

No release notes for AppCenter 2.0.

AppCenter 2.0 New Features

New appcenter-cli for importing/exporting apps to and from AppCenter.

New PKI service to manage certificates.

AppCenter 2.0 Improvements

ECS-2930	Add support for objectClass: groupOfUniqueNames and uniqueMember LDAP attributes
UDAPP-7492	Results, jobs, and downloaded result files have default names instead of UUIDs.
UDAPP-8003	Added PG metrics to Grafana dashboard.
UDAPP-8073	Custom icons for apps added through appctl and deploy-service.
UDAPP-8113	Improved security for bring-your-own containers.
UDAPP-8759	Improved user management.
UDAPP-8773	Upgraded Amabassador to 1.0.0.
UDAPP-8884	Ugraded Console to 1.6.2.
UDAPP-8885	Upgraded Grafana to 6.5.1.
UDAPP-9020	Retaining additional parameters information from previous selection when container image is updated.
UDAPP-9021	Option to rerun scheduled jobs that fail.
UDAPP-9036	Ability to hide container image parameters not relevant to users.
UDAPP-9065	Upgraded Prometheus, Alertmanager, and Thanos.
UDAPP-9291	Base containers now use native consul connect for improved resiliency with service mesh.

AppCenter 2.0 Resolved Issues

ECS-2946	User sync works for users in a subtree.
ECS-2954	Users who fail login are not imported.
ECS-3120	Long-running queries do not have sensitive information exposed due to lax CORS policy.
ECS-3121	Added necessary cookie attributes.
ECS-3123	Added protection for sensitive cookies.
UDAPP-8206	OS commands are disabled through BTEQ.
UDAPP-8907	Apps are no longer left in stale state after AppCenter has been restored.
UDAPP-9302	Navigation menu now fully visible.

UDAPP-9345	Disabled weak ciphers.
UDAPP-9496	App versions retain information from previous scans.
UDAPP-9520	Supporting min TLS v1.2.

AppCenter 2.0 Open Issues

ECS-2976	User search filter allows restricted user login.
UDAPP-9478	HTTPS does not work in Abassador 1.0.0.
UDAPP-9650	Garbled results occur when job-service pods go down while running scripts.
UDAPP-9694	App updated passes unrelated parameters.
UDAPP-9715	Image scan fails to authorize user after migration.

Teradata® AppCenter 1.10 Release Summary

AppCenter 10 Release Notes

No release notes for AppCenter 1.10.

AppCenter 1.10 New Features

LDAPS encryption option is now available.

Hive is no longer an available option when defining new systems. Any previously-defined Hive systems will not appear in the list of available systems.

AppCenter UI displays version number.

When adding a system, you no longer need to test the connection.

Support for passing logged-in users credentials to the Teradata database while running a SQL app, and using corporate login credentials to access the database while running a SQL app.

For apps that run until stopped, you can bypass authentication for access to the app.

For apps that run once or on schedule and scripts, you can select multiple values for queries associated with SQL type fields.

For apps that run once until stopped, job results include the job execution date, includes the description under job name in execution history, and uses the assigned name for the downloaded CSV or TSV file.

Ability to filter jobs by job status.

Links in emails for job results take you directly to the results page with the first result selected automatically.

Job execution status includes options for filtering by type, status, name, owner, and staged, start, or end date.

An audit log has been added for users who stop a job.

Added new beta-phase Sigma and Sankey visualizations.

AppCenter 1.10 Improvements

No improvements for AppCenter 1.10.

AppCenter 1.10 Resolved Issues

UDAPP-7642	After selecting a null or blank value for SQL type parameters, you can select Run Now.
UDAPP-7789	Double hyphen is allowed in any script.
UDAPP-8546	Imported app no longer include service account information. In the new environment, create a service account and apply it to the app.
UDAPP-8552	Apps that run until stopped support multi-byte characters in the app name.
UDAPP-8576	Administrators list in Manage Users displays all Admin users on the page. You can now search and page through all Admin users.
UDAPP-8570	Suitable resource limits were added for Thanos components.
UDAPP-8674	AppCenter handles request timeout errors while importing bulk users, so you can perform the new search.

AppCenter 1.10 Open Issues

UDAPP-3481	Searching invalid LDAP groups continues even after closing the error dialog. Does not affect functionality.
UDAPP-7551	App title is limited to 65 characters in UI. API supports up to 255.
UDAPP-8075	Teradata "byteint" data type is converted to a number, when it should get converted to Boolean.
UDAPP-8272	When the browser locale is set to Chinese (Simplified), Job Status Metrics appear as zeroes.
UDAPP-8274	The string "Hint" needs to be translated.
UDAPP-8354	Reset pagination state when entering new search term to prevent "No users to display" message.
UDAPP-8408	Sorting does not work on date type columns in the result data set screen.
UDAPP-8761	Expired results shouldn't be selectable.
UDAPP-8794	For invalid values, show an error when Save is selected.
UDAPP-8927	App-service and user-service fail to fetch token during installation.
UDAPP-8966	Restore operation fails when AppCenter is not installed. After restore fails, the vault on the cluster is non-recoverable and AppCenter cannot be installed. Ensure AppCenter services are installed before performing a restore operation.
UDAPP-9027	Cached page loads occasionally cause /start-login redirect loop.
UDAPP-9039	Apps can't be deployed via deploy service on pre 1.10 migrated clusters.

Teradata® AppCenter 1.9 Release Summary

AppCenter 1.9 Release Notes

No release notes for AppCenter 1.9.

AppCenter 1.9 New Features

AppCenter support for Azure with Vantage only, not standalone AppCenter.

AppCenter 1.9 Improvements

UDAPP-8259	Supports Elasticsearch on 24-node cluster.
UDAPP-8294	Supports Prometheus on 24-node cluster.

AppCenter 1.9 Resolved Issues

UDAPP-7803	Suitable resource limits were added for Thanos components.
UDAPP-8227	Increased Elasticsearch client replicas to 3.

AppCenter 1.9 Open Issues

No open issues for AppCenter 1.9.
